PACLOCK

THE FUTURE OF PADLOCKS

PACLOCK manufactures a large assortment of traditional solid and laminated body padlocks; hidden shackle and hockey puck-style locks; transportation locks; government locks; hasps; and smart lock solutions.

For those that need to have Master-Keys in their system or even several levels of Master-Keys for managers or supervisors, **PACLOCK** possesses the ability to create a tiered lock system where managers and owners always have the required access, and those who don't are kept out.

PACLOCK is now a part of the ASSA ABLOY family.
