

Revolutionizing Electronic Access Control

150 Series eLock: Cabinet Version

CompX eLock 150 Series is a keyless, non-network electronic access control for cabinetry. Since the eLock is keyless system, there are NO keys to lose or share. The eLock also provides a comprehensive audit trail of the last 1500 access attempts – including date, time and user name – which can be downloaded and viewed with LockView 5/5Pro software.

- Audit trail of last 1,500 access attempts with date, time and user name
- 250 user/supervisor codes
- Three modes of access: Keypad, HID Prox or iCLASS HID
- Motor driven latching mechanism
- 6-AA battery pack; premium brand Alkaline batteries
- Low battery indicator
- Jump start battery override available through mini USB communication
- Audible alarm bolt system
- Mini USB communications port for audit trail download
- Compatible with 12-volt electric door strikes to control access on interior doors

150 Series eLock: Refrigerator / Freezer Version

Refrigerator / Freezer versions have the same features as the 150 Cabinet version and is enclosed in a housing which mounts directly to the appliance door. The strike plate is easily mounted on the top or side of the appliance and provides a secure latching point for the latch. All eLocks have non-volatile memory ensuring that all users, audit trails and other programmed features are not lost due to loss of power. The motorized spring loaded latch provides the convenience of automatic relocking – eliminating the need for cumbersome hasps and padlocks.
