HID Bring Today's Organizations Into The Future Of Access Control

Security meets modernity with HID Signo, the signature line of access control readers from HID Global. Featuring a sleek, upscale design, HID Signo Readers extend HID's tradition of best in class performance while adding innovative features to keep organizations secure.

Signo Readers are simple to install, making the upgrade process easy for everyone.

Highly Versatile: Support for the widest range of credential technologies, including HID Mobile Access via native Bluetooth and Near Field Communication (NFC) capability. Also features Apple's Enhanced Contactless Polling (ECP) to support credentials in the Apple Wallet.

Unparalleled Performance: Ultra secure storage of cryptographic keys on certified secure element hardware, plus a new surface detection feature that allows the reader to automatically recalibrate and optimize read range performance.

Connected to the Future: All readers include out-of-the-box support for Open Supervised Device Protocol (OSDP) for secure bidirectional communication. Each reader is also designed to be connected and managed remotely without "sneakernet" or the need to be physically touched.
