

DL100 Wireless Deadlatch with Aperio Technology

Ready for retrofit, renovation or any commercial project with an existing MS door prep, the DL100 combines electrified locking hardware with an access control system in standard aluminum-stile doors. The DL100 uses low energy motorized EcoLatch technology for silent operation and supports HID multiclass SE and NFC/BLE mobile access card technologies, easily interfacing with existing access control systems to extend real-time, cost-effective security to more openings.

Flexible Wireless Connectivity - Designed for Versatility - Convenient and Secure

- Integrates with most existing access control systems and credentials
- Audit trail limited by access control system
- Fail secure operation (standard)
- Integrated locked state and tamper monitoring
- Universal compatibility with any existing MS door prep
- Features low energy EcoLatch motorized actuator technology
