

**KRYPTO**  
HIGH SECURITY SOLUTION

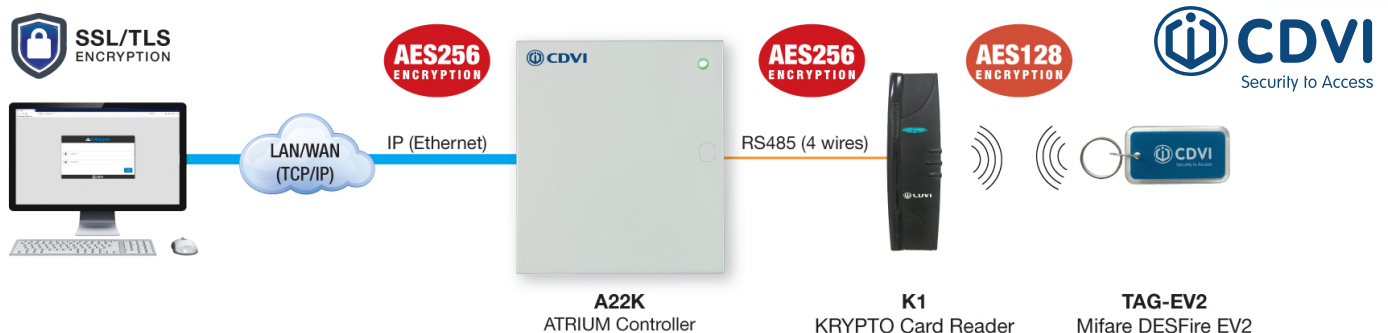

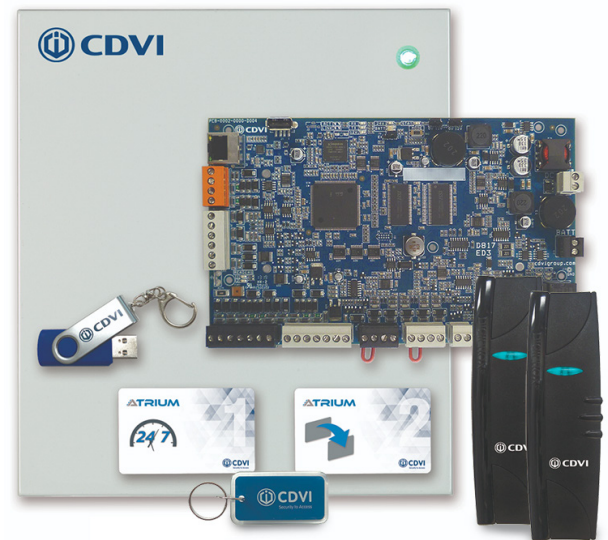

## HIGH SECURITY MADE EASY

Use your smartphone, tablet or any web-enabled device to easily manage the system over a secure connection in the office, at home or on the road. ATRIUM's unique and effortless card enrollment mode minimizes system start up and simplifies your life.

KRYPTO Mifare DESFire EV2 readers combined with CDVI EV2 credentials work right out of the box. Factory-programmed, industry-unique secure CDVI protocol and encryption keys ensure end-to-end encryption between the card, reader and A22K door controller.

### K1 KRYPTO Reader Features
