

# ELECTRONIC KEY CONTROL CABINETS

## The Latest Technology In Key Security

C.Q.R.iT is a complete range of electronic cabinets and lockers that provide state-of-the-art management of your keys and asset. Stop wasting time and resources to manually allocate and track company assets such as vehicles. C.Q.R.iT provides a fully-automated, electronic system that is user friendly for managers and end users alike.

Keys are locked securely inside the cabinet, which can only be opened with correct authorization such as PIN/Card access. The door will unlock, and the user will only be able to remove key/s that they have access to (indicated by an LED). The C.Q.R.iT is simple to access while maintaining security of your valuable assets.

### Features

- Always know who has accessed a company asset, and when
- Only those users with correct permissions can use each asset/key
- Identify those responsible for misuse of your asset
- Reduce theft and stock losses
- Reduce the cost of replacing keys
- Stop unauthorized access to restricted areas
- Know when keys are accessed and returned
- Finally say good bye to unreliable paper or manual systems
