

**THE PERFECT SOLUTION FOR IDENTIFYING SINGLE OR DOUBLE-SIDED FLAT PROFILES AND DIMPLE PROFILES**

## **Camillo Bianchi Reader Advance**

Thanks to a simple recognition system and a 7" display with intuitive interface, this process is quick and easy! Just place the key in the slot and the system will show the best references of the key blanks to be duplicated and the hook where they are located in only a few seconds. There are no buttons to push, no manuals to study and no personal computers to connect to!

The Camillo Bianchi Reader Advance is reliable, fast and complete: profile recognition is carried out by an immediate check of the compatibility of the profiles included in the selected databases, and that then are displayed graphically on screen, together with the list of manufacturers and their comparative codes.

The supplied databases are organized by geographical area, so as to make it possible to select the lists concerning the user's own market. The position of key blanks can be managed from the display or from a personal computer, thanks to the import/export function of the hook database.

### **Features**

- Advanced Database Recognizes Key Profiles
- Displays Key Profile Graphically on Screen
- Identifies and Displays Lists of Manufacturers for Key Profile
- Shares Manufacturers Comparative Codes for Key Profile
- Profile Databases are Organized by Geographical Area
- Works on Single-Sided, Double-Sided and Dimple Profiles
- Import/Export Function

Part #: BIAB1702-ADV  
Hot #: 157456
