ACCESS CONTROL SYSTEMS

## Access Control Software That Functions On A Higher Level

Keyscan Access Control Systems has an international reputation for versatility, flexibility and scalability. These unique attributes allow customers to provide their customers with total control from one system.

Because they design and engineer all of their hardware and software, they ensure the highest level of quality and seamless integration throughout our line of products. Focusing on Keyscan Access Control System's single hardware and software approach, dealers benefit from a truly consolidated access control product solution for your marketplace, reducing staff training time and optimizing your service capability.

- Support for 45,000 credentials (with expansion to 90,000\*)
- Ten (10) assigned groups to a single credential holder
- Multiple credentials assignable to a single user
- Unlimited optional user definable fields
- Full or partial facility lock down from client, reader or input device
- New multi-threaded communication structure
- Optional licensed and Add-on modules for enhanced functionality
- Supports small and mid-size access control installations

Fuelled by 25 years of research and development, Keyscan is the software platform that eclipses industry standards. With new features, enhanced capabilities and expanded capacity, Aurora anticipates your evolving needs.
