

LOCKNETICS®

Discover The Simplicity Of Locknetics

Backed by the strength and promise of Allegion, Locknetics provides electromechanical hardware for access control solutions.

Designed to fit the challenges of everyday, on the job applications, the Locknetics portfolio, with electric strikes, electro-magnetic locks and access control accessories, offers more options with fewer SKUs, all at a practical price point.

- **Electromagnetic locks** are designed for high profile openings that require a tamper-resistant lock with an aesthetically pleasing appearance. A stainless steel housing, fire-rated epoxy seal, optional mounting bracket and an assortment of brackets enable the WMG Series to be used in a variety of applications. Designed for up to 600 lb. or 1200 lb. holding strength.
- **Electric Strikes** are designed for use with heavy duty mortise locksets and cylindrical locksets. Five different faceplates included for optional flexibility of installation in wood or metal frames.
- **The push to exit button** series combines the most popular buttons in one box. The IPB Series is packaged with multiple lens options and switches for flexibility. The metal push to exit button provides increased security with a durable and stylish appearance.
- **The touch sense** is a cap sense style switch. There is no movable action in the switch, but instead only a touch is required to operate it. The illuminated bi-color LED provides easy status indication.
- **The touchless wave sense** series is ideal for request-to-exit situations where a sanitary environment is desired such as healthcare facilities, restaurants, restrooms or labs.
- **The touchbar** is a request to exit device, usually installed as a redundancy to other access control devices for non-fire rated indoor doors.
- **The PPH** Series of push plates are dependable, responsive and easy to install stainless steel switches. These assisted door controls are ideal for a broad range of door automation.
