

# 5200 Series

Low Energy Door Operator

The Norton Rixson 5200 Series is an electromechanical low energy door operator offering intelligent functions, such as adjustable hold open, power close, and latch assist. This cost effective operator is ideal for non-fire rated interior doors, such as restrooms or offices, requiring a slim profile to blend seamlessly with the frame. Complete with Wi-Fi programming via any device for easy installation and setup - no internet connection required.
