

Paxton 10

Access Control & Video Management
On A Single Platform.

Access control and IP cameras regularly co-exist in the same buildings yet are rarely integrated due to the complexity. **Paxton10** combines both technologies to remove the complexity and deliver the benefits of an integrated solution.

Access Control offers a secure, convenient, flexible and cost-effective way of controlling who has access to your building and when that access is allowed.

Video Management provides surveillance of your site, increasing the security of your building without complicated integrations.

- Free Bluetooth Smart Credentials (Zero license fees)
- Use of a smartphone or smartwatch as an access token
- Feature-rich video management software
- Paxton10 cameras, making system set-up simple
- Third-party IP cameras also supported
- Free iOS and Android apps to support remote site management and site access
