

# REVOLUTIONIZING DOOR HARDWARE

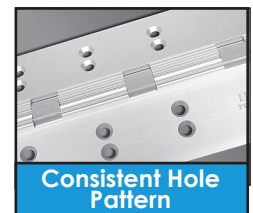

SELECT unveils HD300 & HD600 hinges, customized to your door's weight and frequency for seamless swinging precision

**The HD300 & HD600 hinges are customized to your doors weight and frequency for seamless swinging precision!**

SELECT's continuous hinges outlast any others on earth, but their innovators never sit back. If there is an ingenious way to improve their hinges, they find it! The two new lines of Heavy Duty (HD300/HD600) hinges are so strong that they discontinued their Standard Duty (SD) line.

All SELECT geared continuous hinges (excluding SL38 & SL62) now conform to BHMA Standard ANSI/BHMA A156.26 Grade 1.
