

Dear Customer -

Thank you for deciding to purchase this high quality and high security **Mul-T-Lock®** product.

Hercular™ is probably the best Deadbolt lock available on the market today.

The new **Captive Key** feature provides you with an 'all in one' product, which combines the **security** of a double cylinder lock with the **safety and convenience** of a single cylinder lock!

How to use your Hercular™ lock:

In 'single cylinder' mode:

Once inserted into the central aperture of the lock, the special thumbturn key will securely stay in place.

This will give your lock the functionality, safety and appearance of a single cylinder deadbolt.

It is recommended that while people are on the premises, the thumbturn key be left in the lock!

In 'double cylinder' mode:

When leaving the premises, you can remove (and securely store) the thumbturn key.

To do so, you will need a regular key for the same lock. Simply insert it into the other key aperture and turn it 90°.

This will enable you to pull and remove the thumbturn key; then turn back and remove the regular key.

Your lock will now have the functionality, appearance and security of a double cylinder lock.
