The BEST 9K Series Now Houses Most Interchangeable Cores

The 9K has long been a top choice for its quick installation, safety and durability. Now, we've made it an easy choice, too, by updating it to house most large format interchangeable cores. Just slide the existing core out of the lock you're replacing, install the new 9K, and slide the old core back into the 9K lever. No assembly, drilling or re-keying required. It's the easiest upgrade you'll ever make.

When you purchase 1 case (9) of 9K Series Levers, you will receive a \$50 Amazon Gift Card and two 6 in 1 screwdrivers*.

QDC100 Series: Versatility & Durability For A Wide Variety Applications

With cast iron construction, retrofit-compatible features and a wide array of options, these ANSI/BHMA Grade 1 closers provide the strength and versatility institutional and industrial markets demand. Built with robust materials and designed for easy customization and retrofit, the QDC100 delivers lasting security for even the most rigorous applications.

When you purchase 1 case (3) of QDC Closers, you will receive a \$20 Amazon Gift Card and two 6 in 1 screwdrivers*.

Valid on all order from March 1, 2019 to April 30, 2019.

* Limited to 4 screwdrivers per IML Account.
