

Schlage Electronic Locks Promotion

Take security to the next level with electronic access solutions. They let you manage your openings with user tracking, door monitoring, lockdown and other capabilities that can be applied campus-wide or to just one door. You gain a better level of intelligence and control for the who, where and when of access for security that's more immediate and easier to manage.

A wide range of credential reader options allows efficient, simplified control for granting and revoking user rights. Flexible and upgradable locks also provide savings and convenience. As credential technologies immerge, upgrade without replacing the locking mechanism. You can even move from standalone to networked over time and as budgets permit.

For each NDE, LE, CO Series or AD Series lock you purchase from August to September 2017, you will receive a \$20 Lowes gift card.

Visit us on-line at www.imlss.com or ask an IML Representative for more product details.
